PROFILE

I'm Computer Science student with an interest in trying new technologies through problem solving, creativity and hands-on experience. I am adaptable and work under pressure. I am also always learning new things to further develop my skills and challenge myself.

PROJECT EXPERIENCE

Wat Thang Luang Website Official
Project Frontend Web Application
2025

The official mobile-first website for Wat Thang Luang Buddhist Sunday School, dynamic PR content, and a seamless online donation gateway.

Academic Registration & Admin Dashboard of Wat Thang Luang
Project Fullstack Web Application
2025

LA robust internal platform built to replace legacy paper-based workflows with a fully digitized system. It encompasses a self-service academic portal for students and a powerful, data-driven back-office application designed to optimize administrative efficiency and operational management.

Food Delivery Web Application
Workshop Fullstack Web Application
2024

I learned and experimented with creating a web application about food ordering system using React.js and Node.js. to build new skills in using frameworks.
